MADE IN ITALY

COMPANY PROFILE

VIA S. ALLENDE 111-113
41122 MODENA (ITALY)

MAIN MARKETS:

We produce different parts for highly diversified markets:

- Hydraulics
- Transmissions
- Transport
- Energy

MAIN INTERNAL ACTIVITIES:

We manage the product in each phase of manufacturing process: raw material, machining, special processes and quality control.

- Cad 2D/3D Design
- Turning CNC
- Milling CNC
- Gearing
- Grinding
- Lapping
- Washing
- Internal metrological laboratories

PRODUCTS:

We produce from small to medium series.

- **Materials:**
cast iron, steel, aluminium (avional, ergal) and teflon.
- **Production volume:**
180.000 pieces per year.
- **Batches:**
from 1 to 20.000 pieces per year.
- **Size:**
from 10 to 1.000 mm³.

QUALITY:

- Quality Management System Certificate
UNI EN ISO 9001
- Two metrological rooms of 70m² equipped for different controls: dimensional, geometric, surfaces and hardness.

TECHNOLOGY:

- Thanks to our know-how, we are constantly looking for solutions to improve the product in the key features for the customers to better meet his actual needs.
- If required, the company projects and realizes parts in co-design with clients to optimize processes for quality and costs.

SERVICES & WARRANTIES:

- **Pre-sales & analysis:**
value analysis, feasibility analysis, PFMEA, co-design product.
- **Terms of sale:**
management to supply orders (closed, JIT, kanban, etc.), delivery directly on the assembly line.
- **After-sales & warranties:**
traceability production batch, insurance product, 2-year warranty, organizational system in accordance with D. Lgs. 231/01.
